Pinion Software CEO to Present "*Protecting the Engineering Data You Must Share*" at Aerospace Design Expo

Speech to cover the complex challenges of sharing and protecting engineering data in today's outsourced environment

Austin, TX – August 29, 2006 -- Pinion Software, Inc., the leading provider of Technical Rights Management™ (TRM) solutions, today announced Pinion CEO Darryl Worsham will be a guest speaker at Aerospace Design Expo 2006, November 14 -16 2006, at the Anaheim Convention Center in California. Mr. Worsham will present "*The Hard Problem: Protecting the Engineering Data You Must Share*" in the Open Forum Auditorium #1 featuring Design Products and Technology. Aerospace Design Expo is a three-day event designed to connect professionals from aerospace design and development teams with leading providers of software, materials, avionics, rapid prototyping and more.

During his presentation, Mr. Worsham will explain how Pinion technology delivers a file security level of "In-Use" protection during design collaboration, outsourced contract manufacturing, and other technical business processes where engineering data is shared via the Internet with partners, vendors, or contractors. Worsham will also discuss the latest developments of rapidly deployable, server-less security with the Pinion Desktop Packager product and the new Pinion Receiver. Mr. Worsham has extensive experience in working with major enterprise users on protecting sensitive data and high-value company assets.

In Booth #5132, Pinion will exhibit its full line of solutions to "secure and share the information that matters" at Aerospace Design Expo 2006. Pinion Software products are used by engineers, manufacturers, purchasing professionals, and software developers to safeguard proprietary engineering information shared via email, CD, corporate intranet, business portals, or document management systems.

What is Technical Rights Management?

Pinion Software's first-to-market Technical Rights Management (TRM) technology allows users of CAD and other technical applications to produce and share files in their native format, while continuously safeguarding the digital information during its entire lifecycle — from concept to design collaboration to final part production. Engineers and manufacturers can now protect their CAD designs, specifications, and engineering documentation, as well as complex spreadsheets, sales projections, company financials, business plans and strategies, and much more. This comprehensive scope of data protection propels Pinion Software to the forefront of the TRM industry.

About Pinion Software, Inc.

Pinion Software is the leading provider of Technical Rights Management solutions that deliver unparalleled file-security and in-use protection of engineering data. Users of CAD, technical, training, and business applications can create and share files in their native application format while retaining continuous control over how the information is used. Pinion Software protects information both inside and outside the corporate firewall - whether shared by email, CD, corporate intranet, business portals, or document management systems. Founded in 1998, this privately held company is based in Austin, Texas. For more information, visit our website at www.pinionsoftware.com.

Technical Rights Management is a trademark of Pinion Software, Inc.
